SBA WOSB
Woman Owned Small Business

Network Twenty One, Inc

Nationally Certified WBE & WOSB

Our Mission is to provide superior service through an intense focus on professionalism, quality, communication, detail and respect for our clients and the communities they serve.

Company History

Network Twenty One, Inc is a certified WBE & WOSB small business founded in Tampa, Florida in 1998. Originally conceived as a support installation team, Network Twenty One has evolved into a full-fledged telecommunications solution provider: an organization specializing in emerging technologies.

Network Twenty One has been directly responsible for the growth and development of successful service providers in the greater Tampa Bay area. Daily operations consist of routine and customer specific design, engineering and installation of transport facilities and general communications equipment. Our services are not limited to the Node and POP designations; we also deliver services to the customer premise.

With a staff of seasoned professionals Network Twenty One offers a complete turnkey solution to all telecommunications needs. Our resources allow projects to be delivered on time, on budget and at a value competitively priced. Additionally, our services go wherever they are needed with an eager staff always ready to help meet our clients' business opportunities.

Capability Statement

Network Twenty One offers a full range of telecommunications-related services. Whether you need advice and consulting on Cell Sites (Civil), SONET Rings, DC power, DACS, Superstructure, or any other related equipment; we can help find the solution that is right for you. At Network Twenty One, we find out what your needs are and recommend the appropriate solution that will solve your problems. No project is too large or too small for Network Twenty One. We've handled projects ranging from pulling cable to a complete system installation and integration.

Our Cell tower and transport equipment installation teams can handle any networking project. Below is a list of some of the telecommunications projects that we regularly install and activate:

- Nokia Equipment Installations
- External Alarms Installation and Commissioning
- Installation of Cell Site Cabinets (Purcell, Nokia, FCOA, AMOB, CommScope, etc.)
- Troubleshooting and Adjustment Work
- Complete Installation of Optical Equipment from OC3 to OC192 level, including but not limited to Cisco, Nortel, Fujitsu, Alcatel, and Lucent
- Turn-Up, Test and Trouble Shooting of Transmission Equipment
- Installation, Termination and Testing of Fiber Jumpers
- Installation, Termination and Testing of DS1 DS3 cables and DS1 DS3 Signals
- Delivery of T1 and DS0 Service to the Customer Premise
- -48 VDC Power Equipment Installations. (Fuse Panels, BDCBB, Rectifier Bays, Battery Strings)
- Battery Testing (Load stress, voltage drops, etc.)
- Bonding, Grounding and Isolation including Ground Rings and Whips
- Installation of all Phases of DC Power, Including Hot Cuts
- C-Tap, H-Tap, Compression Lugs and all Other Related Terminations
- All Phases of Super Structure Installation (Per Customer's Specifications)

Customer satisfaction is our first concern:

Our technicians are trained not to meet but exceed industry standards on all tasks. Here at Network Twenty One we perform a quality assurance walkthrough on all jobs to be confident of customer satisfaction before requesting a walkthrough with a customer representative.

We at Network Twenty One hold our reputation in the highest regard and look forward to serving your company with a firm commitment towards 100% workmanship and customer satisfaction.

Vision:

To be the premier telecommunications service provider customizing tailored comprehensive solutions meeting the needs of our customers.

Informative:

A word not used by other contractors, but is one we demand from all of our technicians. We will provide updates on job progress to meet and exceed job completion dates.

Value:

We believe in creating long-term value for our company, customers and business partners. Our employees are led by values based on integrity.
